

2 Crane Court, Orinda Reviews and Comments from local Architects

This beautiful modernist home graciously and thoughtfully connects itself to the surrounding landscape. With its interior bathed in natural light, the occupants feel as if they are living in nature all throughout the day and evening.

The 2 Crane Court, Orinda home is a beautiful marriage of site and shelter making wonderful use of its locale.

I have known the owners for many years and this home is a great built example of their decades of experience in the architectural design world.

"This is an amazing house with a very clear vision. The connection between the interior and exterior is very compelling".

Todd Aranaz

2 Crane Court, Orinda
Reviews and Comments from local Architects

The indoor / outdoor visual and circulation connections - thanks to expansive windows with vistas of beautiful surrounding, considerably contribute to the success of this Modern house.

Marcy Wong
WONG LOGAN ARCHITECTS

.....

The home is thoughtfully sited and includes an abundant amount of large floor to ceiling height windows, clerestory windows and skylights to allow daylight to penetrate to the different functions of the house, and to allow maximum views of the lush and manicured garden. The house interior material pallets are rich, modern and elegant. The exterior façade includes simple modern materials that are durable and require minimum maintenance.
