#### INCLUSIONS

We will be painting the stucco on the front face of the house. The shed will be painted on the side of the house. We will make all necessary preparations for paint such as: taping, scraping loose paint, spot priming, covering concrete, caulking, and anything else that might need done. We will be applying the paint with an airless paint sprayer. We will be matching the existing colors of the stucco and shed. We proudly use Sherwin Williams paint. We will be using their "A-100" line of exterior paint.
